Career Objective

- Motivated Software Developer with experience in backend development, specializing in API design, microservices, and database management. Seeking to leverage my technical skills and knowledge to contribute to innovative projects and enhance system performance. Eager to collaborate with diverse teams and embrace new challenges that support both organizational growth and my professional development.

Experience

Exceloid Soft Systems Pvt Ltd

Feb 2022 – Present

Java Backend Developer

Hyderabad, Telangana

- Java Developer specializing in backend development within the ERP domain, successfully contributing to projects that improved system performance by over 30%.
- Proficient in building and maintaining GraphQL APIs, REST APIs, and microservices using Spring Boot, facilitating a 25% increase in data integration efficiency.
- Developed Batch Services in Spring Boot, which streamlined data transfer processes, reducing data synchronization time by 40%. Implemented Scheduling Services that automated 50+ routine tasks, significantly enhancing operational efficiency.
- Designed and implemented robust Notification Services that resulted in a 20% reduction in response time for alerts, improving user experience and system reliability.
- Achieved database optimization that enhanced query performance by 35%, working with both SQL and NoSQL databases and ensuring seamless data operations.
- Created over 10 dynamic, parameterized reports using JasperSoft, enabling better business decision-making through real-time insights.
- Collaborated effectively with cross-functional teams, including front-end developers, to ensure smooth API integration and data flow, contributing to the successful delivery of 5+ projects on time.
- Implemented security measures and performance optimizations that reduced system vulnerabilities by 25%, ensuring application integrity and reliability.
- Familiar with version control (Git), CI/CD pipelines, and agile methodologies, participating in sprints that delivered features with a 95% success rate in meeting stakeholder requirements.

[24]7.ai

Sept 2019 – Sept 2021

Advanced Technical Support Associate

Hyderabad, Telangana

- Troubleshoot and resolved complex issues for iOS and Android devices, enhancing user satisfaction ratings by 15%.
- Collaborated with cross-functional teams to implement process improvements that increased operational efficiency by 20%, demonstrating analytical skills beneficial in software development.
- Utilized CRM and OPUS tools to streamline operations, resulting in a 30% reduction in processing time and showcasing effective time management and communication skills applicable in project management.

Projects

1. Client: Nils and Trading Co. LLC, Dubai, UAE.

Project: **Service Management Web App** | *Java, Spring Boot, PostgreSQL, JasperSoft*

- Developed and maintained backend services, including GraphQL APIs for upsert, get, and delete operations, implementing a microservices architecture that enhanced scalability and modularity, resulting in a 30% increase in performance efficiency.
- Implemented batch services to automate data synchronization between servers, improving data accuracy and reducing manual processing time by 40%.
- Integrated end-to-end service management workflows, including work order generation, inventory control, billing, and invoicing within the ERP system, leading to a 25% improvement in operational efficiency and customer satisfaction ratings.
- Provided production support for critical issues, troubleshooting and resolving system errors, ensuring a 99.9% uptime for services.
- Created user manuals and technical documentation for all services and processes developed, improving knowledge transfer and ease of use for end-users and internal teams, reducing onboarding time by 20%.
- Designed JasperSoft ad-hoc reports for real-time insights, and optimized PostgreSQL with triggers and stored procedures, automating key service management workflows that saved 15 hours per week in manual reporting tasks.

2. Client: Organic Foods and Café, Dubai, UAE.

Project: **Order Fulfilment Delivery Web App** | *Java, Spring Boot, MongoDB, PostgreSQL, Openbravo*

- Developed backend services, including REST API operations in Spring Boot, batch services, and scheduling services, managing the entire order lifecycle from customer order placement to delivery, increasing order processing speed by 35%.
- Managed data storage and operations using MongoDB, performing data retrieval, updates, inserts, deletions, and schema modifications to efficiently handle order-related data, resulting in a 50% reduction in data retrieval time.
- Implemented reporting features, providing insights on total sales, sales per store, store details, and staff information to assist in decision-making, contributing to a 20% increase in sales through targeted strategies, while also creating comprehensive documentation and user manuals for services and processes.

3. Client: APTDC, Tirupati, Andhra Pradesh.

Project: **Pilgrim Tracking and Ticketing System** | *Java, Spring Boot, PostgreSQL*

- Developed an IoT-based pilgrim tracking application using Spring Boot and GraphQL to process data from RFID devices, managing input and storing it in a PostgreSQL database; services were designed for both web-based and mobile applications, improving tracking accuracy by 50%.
- Implemented scheduling, batch, and integration services to extract data from third-party APIs, ensuring seamless data flow and real-time updates, reducing data integration time by 30%.
- Crafted complex queries for a dashboard displaying pilgrim details, bus boarding information, visited locations, attendance, and status reports, enhancing user experience and operational oversight, along with comprehensive documentation and user manuals.

4. Client: CWSuite, Hyderabad, Telangana.

Project: **CWSuite** | *Java, Spring Boot, PostgreSQL, JasperSoft*

- Developed the services in the management suite using Spring Boot and GraphQL for sales, purchase, and finance flows, implementing upsert, get, and delete operations within microservices, improving operational efficiency.
- Designed and optimized stored procedures and triggers for booking sales, processing purchases, and posting account details, enhancing transaction efficiency in the finance module, which reduced processing time by 25%.
- Integrated third-party APIs to calculate GST, ensuring accurate financial reporting and compliance, contributing to a 15% reduction in discrepancies in financial data.
- Wrote complex queries to provide live data and generate detailed reports related to sales, purchases, inventory, and finance, enhancing data visibility and decision-making, while creating ad-hoc reports using JasperSoft and comprehensive service documentation, including user manuals, to facilitate effective utilization of the system.
- Developed a batch process to sync product details, product prices, pricelists, customers, and order details between servers, and implemented a scheduled process to automatically post accounting entries for POS orders, ensuring seamless data consistency and reducing manual intervention by 30%.

Technical Skills

Languages: Java, SQL

Developer Tools: VS Code, Eclipse, STS, JasperSoft, Git Bash, Studio3T, AWS, OmniDB, PGAdmin, Postman

Technologies/Frameworks: Spring Boot, Jenkins, GitHub, Windows, Linux

Certifications: Java and SQL Certification from QSpiders

Education

Anurag Group of Institution - CVSR College of Engineering

B.Tech

August 2015 – June 2019

CGPA - 8.6

Narayana Junior College

MPC

June 2013 – April 2015

Percentage - 85.8

Nalanda High School

SSC

March 2012 – April 2013

CGPA - 8.5
